Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

chitinase (EC 3.2.1.14) 2 precursor - Coccidioides immitis

chitinase (EC 3.2.1.14) 2 precursor - Coccidioides immitis

Nalternate names: chitin hydrolase homolog; CTS2 protein

c;Species: Coccidioides immitis

C;Date: 12-Mar-1996 #sequence_revision 19-Apr-1996 #text_change 13-Nov-1998

C;Accession: JC4566

R;Pishko, B.J; Kirkland, T.N.; Cole, G.T.

Gene 167, 173-177, 1995

A;Title: Isolation and characterization of two chitinase-encoding genes (cts1, cts2)

A;Reference number: JC4565, MUID:96144270; PMID:88566773
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          RESULT 9
A43932
mucin 2 precursor, intestinal - human (fragments)

MANSC domain containing protein 1.
Extracellular (Potential).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Submitted (APR-2001) to the EWBL/GenBank/DDBJ databases.
-!- SUBCELLULAR LOCATION: Type I membrane protein (Potential).
-!- SIMILARITY: Contains 1 MANSC domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       05-JUL-2004 (Rel. 44, Created)
05-JUL-2004 (Rel. 44, Last sequence update)
25-OCT-2004 (Rel. 45, Last annotation update)
MANSC domain containing protein 1 precursor (QtrA-13483).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           431 AA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Transmembrane.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                EMBL; AB060888; BAB46892.1; -.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

TITLE  JOURNAL  JOURNAL  Lab host:  TOPLO  COMMENT  Lab host:  TOPLO  Tel: 81-3-5285-1111 (ex.2120), Fas. 81-3-3285-1181)	Vector: pMELSS-FL3 (AGC.NO. ABOU9804) R. Sitel: DraIII (CACGTGTG) R. Sitel: DraIII (CACGTGTG) R. Sitel: DraIII (CACGTGTG) R. Sitel: DraIII (CACGTGTG) R. Sitel: DraIII (CACGTGTG) R. Sitel: DraIII (CACGTGTG) Description: 1st strand cDNA was primed with an oligo(dT) primer large specific of and 3' primers and amplified by PCR. The PCR product was digested with Sfil and size selection was performed to exclude fragments <1.5kb.The Sfil-digested PCR product was cloned into distinct DraIII sites of pisolate the CDNA insert. Libraries were constructed by oligo-capping method (Sugano et al., , Institute of Medical Science, University of	TORYON  CUSCOM primer used for sequencing  ( 5' end primer [CTTCTGCTCTAAAGCTGCG];  3' end primer [CGACTGCAGCTCGAGCACA] ).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ð
                                                                                                                                                                                                                                                                                                                                            The present invention describes nucleic acids encoding PRO secreted and transmembrane proteins used therapeutically. The PRO proteins have cytostatic, anti-inflammatory, anti-prolliferative and immunosuppressive activity. The proteins and polynucleotides can be used in therapy, identification of homologues, raising antibodies and design of probes and primers. They can be used in a range of diseases related to proteins they have homology with, e.g. a PRO protein having homology to complement proteins may be used in inflammatory responses
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     LeuMetIlePheAspThrArgLysThrAlaArgGlnProAsnCysTyrLeuPhePheCys 100
